PRINCE SONKAR

Aspiring Data Analyst / Data Scientist
Jaunpur, Uttar Pradesh | +91 6393609056 | prince.webdev.in@gmail.com
linkedin.com/in/princesonkar | github.com/princewebdevin-coder

PROFILE SUMMARY

Computer Science undergraduate with hands-on experience in Python, machine learning and data visualization, gained through a Generative AI internship at IBM and applied data science projects and job simulations. Skilled at turning raw data into actionable insights and building end-to-end ML pipelines.

EDUCATION

Babu Banarasi Das University — Lucknow, India

Bachelor of Technology in Computer Science | *GPA: 8.5/10* | *May 2024 – June 2028*

SKILLS SUMMARY

Languages: Python, SQL, C

Frameworks/Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly

Tools: Power BI, Tableau, Excel, PowerPoint, MySQL, SQLite

Platforms: Jupyter Notebook, Visual Studio Code, IntelliJ IDEA, Git/GitHub

Core Competencies: Exploratory Data Analysis, Feature Engineering, Model Evaluation, Data Visualization, Prompt Engineering

Soft Skills: Communication, Team Collaboration, Problem Solving, Time Management

WORK EXPERIENCE

Generative AI Intern | IBM — February 2026 – March 2026

- Streamlined data collection and reporting workflows, cutting processing time by 20% and improving efficiency.
- Implemented process automation solutions that increased team productivity by 15%.
- Conducted market research and analysis, identifying 10+ key trends that informed project direction.

PROJECTS

Mental Health Score Predictor — July 2026 – August 2026

- Built a machine learning model to estimate mental health scores from lifestyle and behavioral factors.
- Handled missing values and encoded categorical variables, improving data quality by 33%.
- Benchmarked multiple classification algorithms to identify the best-performing approach.

AI-Powered Waste Detector — March 2026 – April 2026

- Developed a waste detection platform using FastAPI and the Gemini Vision API to analyze uploaded and real-time camera images.
- Used computer vision to classify waste types, assess risk levels, and recommend disposal methods.

Fake News Detector — October 2025 – November 2025

- Built a machine learning classifier to distinguish real from fake news articles using textual features.
- Preprocessed text through cleaning, tokenization, stop-word removal, and normalization.

CERTIFICATIONS

Applied Data Science with Python — Cognitive Class / IBM Skills Network (October 2026)

Machine Learning Basics — Cognitive Class / IBM Skills Network (October 2026)
